Web Development Fundamentals
Offline training on Skillsbuild with Eyoot
Internship Completion Certificate
The Complete 2022 Flutter & Dart Development Course [Arabic]
Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization

Abdelrahman Mashaal

Software Engineer @Blink22 | Computer and Communications Engineering Student at Alexandria University
Alexandria, Egypt

Summary

A computer and communications student at faculty of Engineering, Alexandria university that is passionate about software engineering and problem solving.

Experience

Blink22

1 year 1 month

Software Engineer

October 2025 - Present (10 months)

Software Engineer Intern

July 2025 - October 2025 (4 months)

Zaylon

Co-Founder & Backend/DevOps Engineer

June 2025 - Present (1 year 2 months)

Alexandria, Egypt

Nile University

Software Engineer Intern

August 2024 - October 2024 (3 months)

Cairo, Egypt

Nile University Software Internship, Working on Cross-Platform Code Conversion using Deep Learning Models. This internship allowed me to engage with technologies like ANTLR, Java, Swift, Grammar Models, Deep learning models, and Large language models to improve cross-platform development.

Information Technology Institute (ITI)

Internet of Things (IoT) Application Development Training

August 2024 - September 2024 (2 months)

Alexandria, Egypt

As an IoT application development intern, I developed several projects, including a bag tracking app using the SigFox network that featured alerts for out-of-range movement and unauthorized openings. I employed data structures and web services to ensure fast and reliable database interactions. Also, I developed a real-time parking system using motion sensors, achieving 85% detection accuracy through Javascript-synced services. I also created a mobile coverage monitoring solution with real-time alerts, improving response time of coverage by 35%. Using these projects, I focused on optimizing performance, ensuring real-time responsiveness for IoT solutions.

WHS

Software Developer

April 2022 - September 2024 (2 years 6 months)

Bangalore, India

As a freelance developer at WHS, I contributed to multiple large scale projects as both a mobile and backend developer as the role of the job required me to. I collaborated closely with designers and fellow developers to deliver high quality applications, utilizing best practices in coding, testing and version control to ensure seamless integration and efficient performance.

Google DSC Zagazig

Google Developer Student Clubs Core Team Flutter Mentor

October 2023 - August 2024 (11 months)

Az Zaqaāzīq, Sharkia, Egypt

As a remote Flutter Mentor, I guided over 30 university students in learning mobile app development using Flutter and Dart. My responsibilities included leading workshops and coding sessions, providing one-on-one mentoring and advising on technical challenges. I also supervised 10+ student projects, assisting in design and architecture and integrating Firebase for robust backend services. Additionally, I collaborated with other mentors in organizing coding events, promoting best practices and building a community passionate about building mobile applications.

CodeAlpha

Mobile Application Developer Intern

March 2024 - April 2024 (2 months)

Bangalore, India

As a Mobile Developer Intern at CodeAlpha, I developed user-friendly applications using Android and Flutter. I collaborated with designers and

developers, implemented testing and debugging, and utilized version control to ensure code quality and performance in the projects that I worked on.

Education

Alexandria University

Bachelor of Engineering - BE, Computer and Communications

Engineering · (October 2021 - June 2026)

Riada International School (RIS)

High School Diploma, IGCSE · (January 2013 - May 2021)
