Samia Hafez

Assistant Professor
Egypt

Summary

A Research assistant looking forward to the improvement of the software process in all aspects.
A teaching assistant eager to deliver the best and most enjoyable learning experience.

Experience

Applied Innovation Center - MCIT
Software Team Leader
July 2025 - Present (1 year 1 month)
Alexandria, Egypt

Alexandria University
Assistant Professor
January 2024 - Present (2 years 7 months)
Faculty of Engineering, Computer and Systems Department, Alexandria Governorate, Egypt

Faculty of Engineering, Alexandria University, Egypt
15 years 1 month

Teaching Assistant and Research Assistant, Computer and Systems Department
June 2013 - Present (13 years 2 months)
Alexandria, Egypt

Assisting professors in teaching several undergraduate courses.
Research in Computer and Systems Engineering.

Teaching assistant
July 2011 - Present (15 years 1 month)
Special Programs Computer/Communication Department

Assisting in computer courses like basic programming, data structures, discrete mathematics and Algorithms.

Research Assistant
July 2011 - June 2012 (1 year)

Computer Engineering department

Research Assistant in SQCATS (Software Quality Control Automation Tool Suite) Advanced research project in Computer and Systems department, Faculty of Engineering, Alexandria University in Association with Unisoft Corp. and Funded by ITIDA. Under the supervision of Prof. Dr. Mohamed Abougabal Prof. Dr. Saleh el Shehaby and Dr. Mustafa el Nainay.

SQCATS is an association of research and industry to produce a suite that utilizes data mining techniques by applying them on a software product in progress. In which both the project's history the historical projects' information are used to find patterns of bugs leading to detecting bugs as soon as possible, and doing the minimum testing effort to ensure the quality of the different functionalities.

The project lasted for a year.

UCCD University Centers for Career Development

Deputy Director

September 2020 - December 2021 (1 year 4 months)

Faculty of Engineering, Alexandria, Egypt

lead a group of career development specialists to provide career advice to the graduates and students in the faculty of Engineering, Alexandria University. Supervise establishing relations with employers to organize recruitment events and info sessions.

Hold employer round tables with the faculty members to identify the skills needed by the industry.

Staffordshire University

Researcher Phd Candidate

February 2018 - July 2018 (6 months)

Stoke-on-Trent, United Kingdom

Staff and student exchange programme funded by erasmus mundus.

Alexandria University

Research assistant and Teaching assistant

June 2011 - May 2013 (2 years)

Medical Research Institute, Biomedical Engineering Department

Studying basics of biomedical engineering and assisting in preparation for courses offered by the department's programs, implementing applications needed by the institute

EJADA

Junior software Developer

September 2010 - June 2011 (10 months)

Alexandria, Egypt

Shared with research team for searching for the most state of the art technologies to try and develop our application.

Shared in spreading knowledge of the state of the art way to ensure quality of software systems.

Faculty of Engineering, Alexandria University, Egypt

Trainee

January 2010 - April 2010 (4 months)

Alexandria, Egypt

Participating in Microsoft Arabic Captions Language Interface Pack CLIP project

Worked among the Egyptian team, that was supervised by Alexandria university, in collaboration with other localization teams, to localize Professional Visual Studio and Visual Studio Express Edition.

Global Impact

Junior Developer under training

June 2009 - August 2009 (3 months)

Alexandria, Egypt

Contribution in the Time Sheet Project during the training period and that included:

- # Extensive database work including database design, T-SQL And using Microsoft SQL server.

- # Working exclusively on the .NET framework and professional usage of its components including ASP .NET, ADO .NET & C#.NET, implementing Email and scheduling based services.

- # Developing numerous web applications using JavaScript and HTML, and Using EXT JS library extensively in developing rich, interactive web applications.

Education

Alexandria University

Master of Science (MSc), Computer Software Engineering · (2010 - 2014)

Alexandria University

Bsc, Engineering · (2005 - 2010)

Kawmeyya Girls College, Language Section

High school Diploma, Mathematics and physics section · (2003 - 2005)
